KURE WORKS

KURE WORKS
Contribution to Society Through Energy and the Environment
KURE Works Goes Global

The Kure Works was established in 1959 as a leading manufactureering facility. It produces and distributes wind energy equipment, and works to ensure sustainable energy transitions. The Kure Works produces natural gas power generator sets, gas turbines, and gas-fired power generator sets, wind power generator sets, and energy storage systems. The Kure Works continues to contribute to environmental sustainability and renewable energy development. Its commitment to innovation and sustainability drives its mission to create a brighter future for all.
